

**IN THE CLAIMS:**

Claim 1 (currently amended): A method for matching medical condition information with a medical resource, the method comprising the steps of:

providing a computer network having a plurality of remote computers and at least one remote server wherein the remote server hosts a website;

accessing the website via an individual remote computer on the computer network;

inputting a query into the website wherein the query relates to a first medical condition;

providing a database on the remote server wherein the database stores first information relating to a plurality of medical conditions and second information relating to a plurality of medical resources wherein the plurality of medical conditions are diseases and disorders and further wherein the plurality of medical resources are medical specialists, specialty hospitals, medical facilities and health facilities which at least one of the plurality of medical conditions; and

searching the first information and the second information in the database for the information wherein the search is based on the query input into the website wherein the medical condition of the query is matched to a second medical condition from the plurality of medical resources in the first information database and further

wherein ~~the search discloses~~ a medical resource from the plurality of medical resources in the second information is matched to the medical condition of the query wherein the medical condition of the query is treatable by the medical resource ~~that treats the medical condition is queried;~~ and

displaying third information via the individual remote computer wherein the third information relates to the second medical condition and further wherein the third information relates to the medical resource which matches the medical condition of the query.

Claim 2 (currently amended): The method of Claim 1 further comprising the step of:

outputting the third information to the individual remote computer.

Claim 3 (previously presented): The method of Claim 1 wherein the medical conditions relate to diseases.

Claim 4 (original): The method of Claim 1 further comprising the step of:

providing medical procedure information to one of the computers.

Claim 5 (original): The method of Claim 1 further comprising the step of:

searching the database for medical procedure information.

Claim 6 (currently amended): The method of Claim 1 further comprising the step of:

disclosing on one of the remote computers a practitioner that treats the medical condition of the query ~~queried~~.

Claim 7 (currently amended): The method of Claim 1 further comprising the step of:

disclosing a medical facility to the individual remote computer wherein the medical facility ~~that~~ treats the medical condition of the query ~~queried~~.

Claim 8 (currently amended): The method of Claim 1 further comprising the step of:

disclosing ~~specific~~ medical resource information relating to the medical resource wherein the ~~specific~~ medical resource information includes a name of the medical resource, a location, contact information and services offered.

Claim 9 (original): The method of Claim 1 further comprising the step of:

linking one of the remote computers to a specific website relating to the medical resource.

Claim 10 (currently amended): The method of Claim 1 wherein the third information discloses ~~a~~ more than one medical resource from the plurality of medical resources that treat the medical condition of the query ~~queried~~.

Claim 11 (currently amended): The method of Claim 1 wherein the query includes identifying information of an individual using the website wherein ~~search results disclosing~~ the third information discloses one of the plurality of medical resources which matches ~~match~~ the identifying information ~~to the medical resource~~.

Claim 12 (currently amended): The method of Claim 1 further comprising the step of:

disclosing ~~a~~ medical resources from the plurality of medical resources that treat the medical condition of the query ~~disorder queried~~; and

ranking the medical resources based on how the medical resources match the query.

Claim 13 (original): The method of Claim 1 further comprising the step of:

providing a plurality of websites on the computer network;

accessing any one of the plurality of websites via the remote computer; and

searching the database via any one of the plurality of websites.

Claim 14 (currently amended): The method of Claim 1 further comprising the step of:

providing a plurality of databases on a plurality of remote servers wherein the databases store the first information relating to the plurality of medical conditions;

linking the databases via the computer network; and

searching the databases for the third information.

Claim 15 (currently amended): A system for matching a medical condition ~~information~~ with a medical resource, the system comprising:

a computer network having a plurality of remote computers and at least one remote server wherein the remote server hosts a website;

a database connected to the remote server wherein the database stores first information relating to a plurality of medical conditions and a plurality of medical resources wherein the plurality of medical conditions are diseases and disorders and further wherein the plurality of medical resources are medical specialists, specialty hospitals, medical facilities and health facilities which treat at least one of the plurality of medical conditions; and

means for inputting a query ~~querying the database~~ wherein the query relates to one of the plurality of medical conditions; and

means for searching the first information in the database ~~for the information wherein the search is based on the query of the database and further~~ wherein the means for searching matches information discloses a medical resource from the plurality of medical resources to the query wherein the medical resource that

treats one of the plurality of medical conditions of the query condition queried;

means for disclosing second information wherein the second information relates to one of the plurality of medical conditions of the query; and

means for contacting the medical resource on the website wherein the medical resource is contactable from the website via the means for contacting the medical resource.

Claim 16 (currently amended): The system of Claim 15 further comprising:

means for outputting the second information from an individual remote computer.

Claim 17 (original): The system of Claim 15 wherein the medical conditions relate to diseases.

Claim 18 (currently amended): The system of Claim 15 wherein the first information relating to the medical conditions further relates to medical procedures.

Claim 19 (currently amended): The system of Claim 15 wherein the first information relates to practitioners that treat one of the plurality of medical condition conditions of the query queried.

Claim 20 (currently amended): The system of Claim 15 further comprising:

a link on the website wherein the link links one of the remote computers to another website providing ~~further~~ third information relating to the medical resource.
